

### **Activity report**

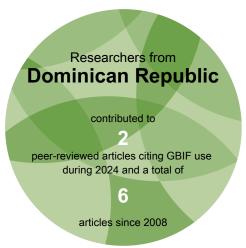

generated January 2025

### Dominican Republic

This report provides a series of summary charts, statistics and other details about the mobilization and use of open-access species data through the GBIF network, relating to users and participating institutions in Dominican Republic. These metrics show status at the time of report generation, unless otherwise noted. Taken together, the elements of this report can help guide and measure progress toward the information needs for biodiversity research, as well as for national commitments on biodiversity and sustainable development.

#### ► Access and usage

#### ► Data availability in Dominican Republic

Animalia 751,597 occurrences

Plantae 176,514 occurrences

Fungi
16,676
occurrences

Unknown 6,913 occurrences

Protozoa
428
occurrences

301 occurrences

Virus
312
occurrences

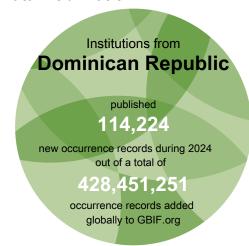

Chromista
1,408
occurrences

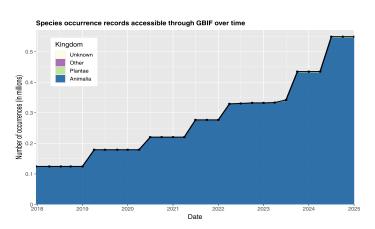

Archaea

Occurrences

#### ► Data mobilization

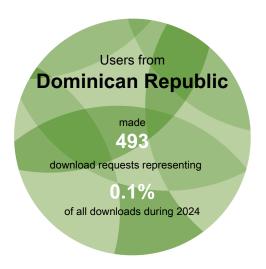

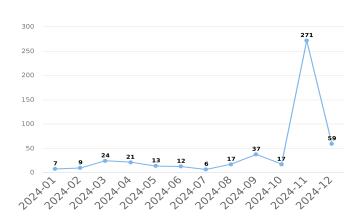

Number of records published by institutions in Dominican Republic, categorized by kingdom

#### Access and usage

#### Data downloads on GBIF.org from users in Dominican Republic

Monthly downloads requested by users in Dominican Republic

### Recent peer-reviewed articles using GBIF-mediated data by co-authors based in Dominican Republic

The GBIF Secretariat maintains and reports on an ongoing literature tracking programme, giving priority to substantive uses of GBIF-mediated data in peer-reviewed literature while identifying the countries or areas of the authors' institutional affiliations. The citations below represent the five most recent journal articles with at least one co-author from Dominican Republic.

Those interested in assisting the Secretariat in identifying additional peer-reviewed uses of GBIF-mediated data may forward relevant citations to comms@gbif.org.

Morejón-Arrojo, Sellares-Blasco, Guendulain-García *et al.* (2024) First occurrence of the invasive jellyfish Phyllorhiza punctata in the Dominican Republic: seasonal trend and invasion in the Atlantic Ocean. *Bulletin of Marine Science*.

https://doi.org/10.5343/bms.2024.0061

Pérez-Escobar, Bogarín, Przelomska *et al.* (2024) The origin and speciation of orchids. *New Phytologist.* 

https://doi.org/10.1111/nph.19580

Juncá Morales, Rodríguez de Francisco, López Hidalgo *et al.* (2021) Endemic Juniperus gracilior varieties of the Hispaniola island, tree taxa of environmental and economic relevance and a valuable phytochemical source. *Bosque* (*Valdivia*).

https://doi.org/10.4067/s0717-92002021000100007

Sangermano, Bol, Galvis *et al.* (2015) Habitat suitability and protection status of four species of amphibians in the Dominican Republic. *Applied Geography.* 

https://doi.org/10.1016/j.apgeog.2015.06.002

Mengual, de Soto Molinari. (2020) First record of the genus Syritta Le Peletier & Audinet-Serville, 1828 (Diptera, Syrphidae) from the West Indies. *Check List*.

#### **Data availability**

#### Total data available for selected taxonomic groups in Dominican Republic

Mammals 13,455 occurrences

Birds 561,154 occurrences

Bony fish 7,185 occurrences

Amphibians 11,781 occurrences

Insects
52,649
occurrences

Reptiles 52,077 occurrences

Molluscs 29,420 occurrences

Arachnids 6,596 occurrences

Flowering plants
137,073
occurrences

Ferns
18,995
occurrences

Gymnosperms
833
occurrences

Mosses 13,759 occurrences

Sac fungi 11,466 occurrences

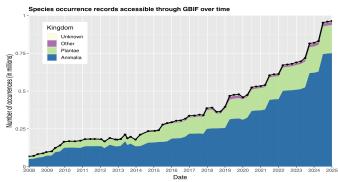

Basidiomycota 5,157 occurrences

Mammals = Class Mammalia Birds = Class Aves Bony fish = Superclass Osteichthyes p.p. Amphibians = Class Amphibia Insects = Class Insecta Reptiles = Class Testudines, Sphenodontia, Squamata & Crocodylia

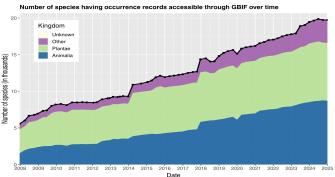

Molluscs = Phylum *Mollusca*

#### Change over time in records about biodiversity in Dominican Republic

Occurrence records available about species occurring in Dominican Republic

Species for which at least one occurrence record is available in Dominican Republic

### WHY MIGHT THE AMOUNT OF MOBILIZED DATA DECREASE?

Datasets are sometimes removed by publishers, but more often decreases in the number of records are due to the removal of duplicate records and datasets.

**SPECIES COUNTS** represent the number of binomial scientific names for which GBIF has received data records, organized as far as possible using synonyms recorded in key databases like the Catalogue of Life

#### Most recent datasets from publishers in Dominican Republic
