## Greenland

This report provides a series of summary charts, statistics and other details about the mobilization and use of open-access species data through the GBIF network, relating to users and participating institutions in Greenland. These metrics show status at the time of report generation, unless otherwise noted. Taken together, the elements of this report can help guide and measure progress toward the information needs for biodiversity research, as well as for national commitments on biodiversity and sustainable development.

### ► Access and usage

### ► Data availability in Greenland

### ► Data mobilization

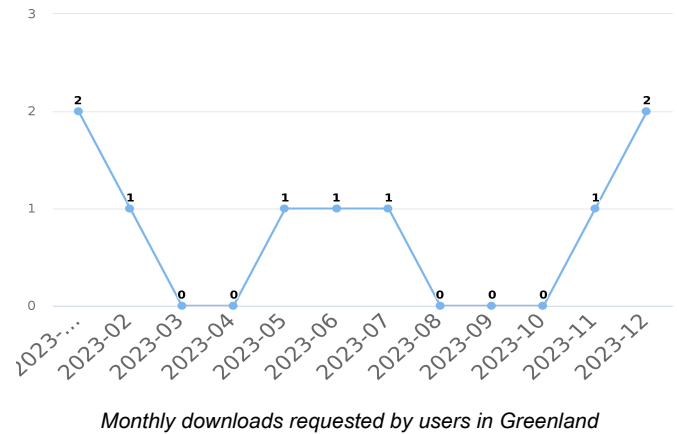

Number of records published by institutions in Greenland, categorized by kingdom

## Access and usage

### Data downloads on GBIF.org from users in Greenland

### Recent peer-reviewed articles using GBIF-mediated data by co-authors based in Greenland

The GBIF Secretariat maintains and reports on an ongoing literature tracking programme, giving priority to substantive uses of GBIF-mediated data in peer-reviewed literature while identifying the countries or areas of the authors' institutional affiliations. The citations below represent the five most recent journal articles with at least one co-author from Greenland.

Those interested in assisting the Secretariat in identifying additional peer-reviewed uses of GBIF-mediated data may forward relevant citations to [comms@gbif.org](mailto:comms@gbif.org).

Vihtakari, Hordoir, Treble *et al.* (2021) Pan-Arctic suitable habitat model for Greenland halibut. *ICES Journal of Marine Science*.  
<https://doi.org/10.1093/icesjms/fsab007>

Wisz, Broennimann, Grønckjær *et al.* (2015) Arctic warming will promote Atlantic–Pacific fish interchange. *Nature Climate Change*.

### Data availability

### Total data available for selected taxonomic groups in Greenland

Mammals = Class <i>Mammalia</i>	Insects = Class <i>Insecta</i>	Arachnids = Class <i>Arachnida</i>	Ferns = Phylum <i>Pteridophyta</i>
Birds = Class <i>Aves</i>	Reptiles = Class <i>Testudines, Sphenodontia, Squamata &amp; Crocodylia</i>	Flowering plants = Phylum <i>Magnoliophyta</i>	Mosses = Phylum <i>Bryophyta</i>
Bony fish = Superclass <i>Osteichthyes</i> p.p.	Molluscs = Phylum <i>Mollusca</i>	Gymnosperms = Superclass <i>Gymnospermae</i>	Sac fungi = Phylum <i>Ascomycota</i>
Amphibians = Class <i>Amphibia</i>		Basidiomycota = Phylum <i>Basidiomycota</i>	

### Change over time in records about biodiversity in Greenland

**WHY MIGHT THE AMOUNT OF MOBILIZED DATA DECREASE?**

Datasets are sometimes removed by publishers, but more often decreases in the number of records are due to the removal of duplicate records and datasets.

**SPECIES COUNTS** represent the number of binomial scientific names for which GBIF has received data records, organized as far as possible using synonyms recorded in key databases like the Catalogue of Life

### Most recent datasets from publishers in Greenland

The vascular plants of south-east Greenland 60°04' to 64°30' N.Lat. 1933. *Published by Greenland Institute of Natural Resources*  
<https://doi.org/10.15468/v4e6gm>

The Flora of Melville Bugt 1943. *Published by Greenland Institute of Natural Resources*  
<https://doi.org/10.15468/spq46v>

Conspectus Florae Groenlandicae. *Published by Greenland Institute of Natural Resources*  
<https://doi.org/10.15468/p5m5cd>

Adventitious plants in Greenland 1972. *Published by Greenland Institute of Natural Resources*  
<https://doi.org/10.15468/u6jcrp>

Salt marshes on Qeqertarsuaq 1972. *Published by Greenland Institute of Natural Resources*  
<https://doi.org/10.15468/g5x3r>

Vascular plant herbarium specimens at Greenland Institute of Natural Resources. *Published by Greenland Institute of Natural Resources*  
<https://doi.org/10.15468/8s9bw9>

Flora of Greenland Checklist. *Published by Greenland Institute of Natural Resources*  
<https://doi.org/10.15468/r9efxw>

### Occurrence records downloaded from GBIF.org, published by institutions in Greenland

Number of occurrence records downloaded via GBIF.org published by institutions in Greenland

## Data mobilization

### Data sharing with country or area of origin by national institutions in Greenland

Data sharing with country or area of origin

The chart above shows the number of records shared over time by publishers within Greenland, with separate colours for records about species occurring within undefined and those occurring elsewhere.

### Top data contributors about biodiversity in Greenland

Rank	Country or area	No. of occurrences
1	Denmark	213,613
2	United States of America	96,413
3	United Kingdom	77,462
4	Estonia	77,103
5	Germany	47,795
6	International organization or unknown country	47,505
7	Norway	36,732
8	Greenland	20,910
9	Sweden	14,459
10	Canada	9,971

Table 1. Ranking of countries or areas contributing data about Greenland

### Top datasets contributing data about Greenland

- NHMD Vascular Plants Collection. *158,025 occurrences in Greenland.* (Last updated 20 Dec 2023)
- Global soil organisms. *70,257 occurrences in Greenland.* (Last updated 27 Feb 2023)
- The CPR Survey. *40,020 occurrences in Greenland.* (Last updated 23 Feb 2022)
- International Barcode of Life project (iBOL). *33,398 occurrences in Greenland.* (Last updated 2 Jan 2024)
- NHMD Ichthyology Collection. *20,434 occurrences in Greenland.* (Last updated 18 Dec 2023)
