

generated January 2026

Haiti

This report provides a series of summary charts, statistics and other details about the mobilization and use of open-access species data through the GBIF network, relating to users and participating institutions in Haiti. These metrics show status at the time of report generation, unless otherwise noted. Taken together, the elements of this report can help guide and measure progress toward the information needs for biodiversity research, as well as for national commitments on biodiversity and sustainable development.

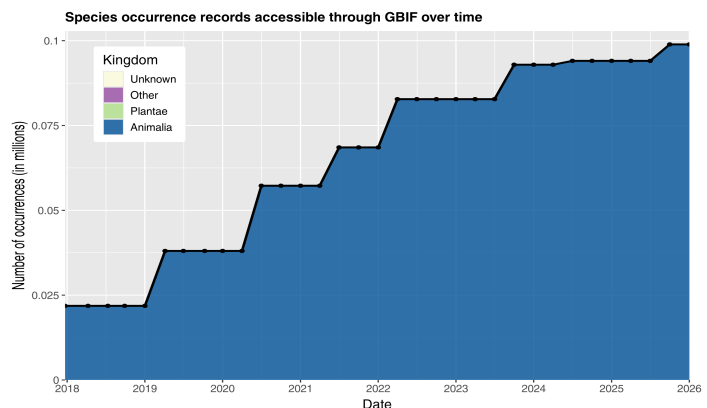

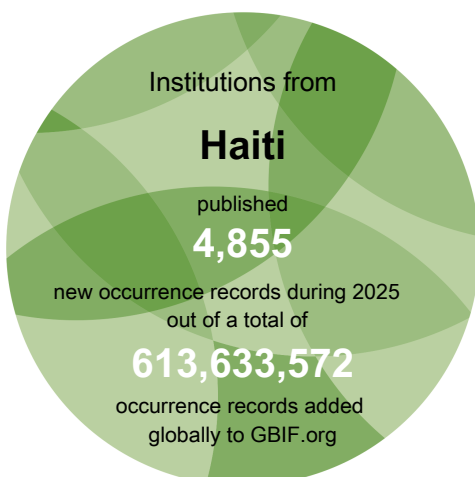

► Access and usage

► Data availability in Haiti

► Data mobilization

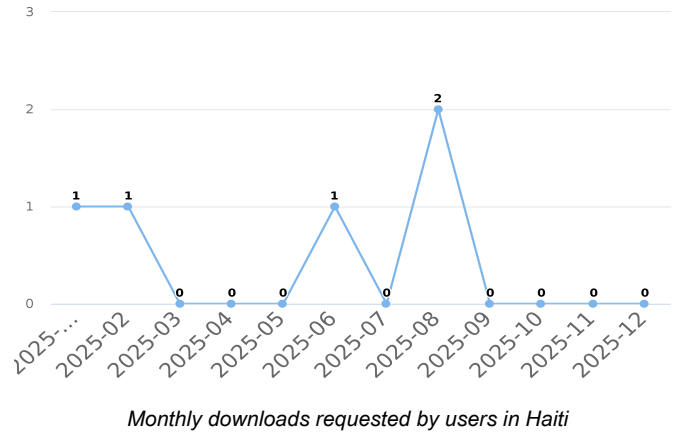

Number of records published by institutions in Haiti, categorized by kingdom

Access and usage

Data downloads on GBIF.org from users in Haiti

Data availability

Total data available for selected taxonomic groups in Haiti

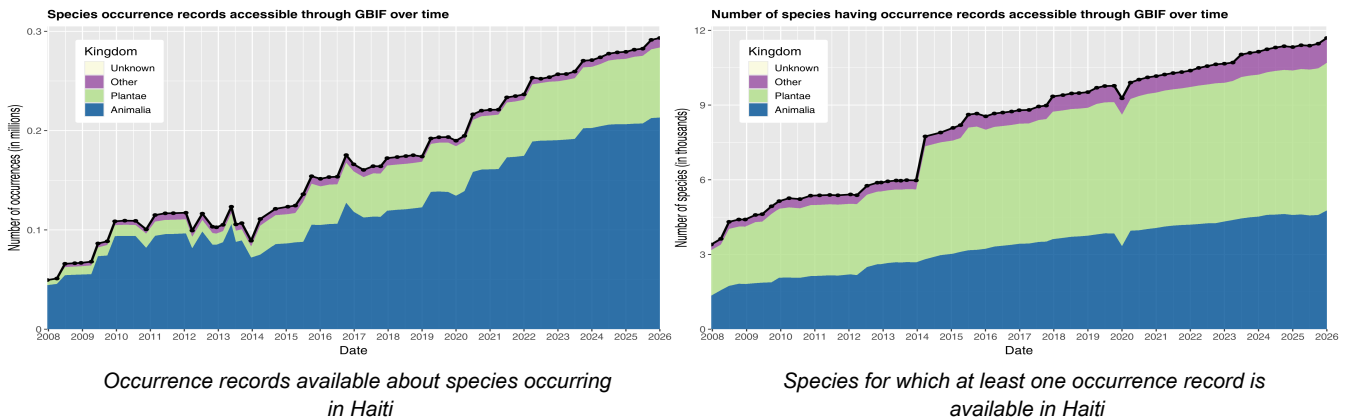

Mammals = Class *Mammalia*
 Birds = Class *Aves*
 Bony fish = Superclass *Osteichthyes* p.p.
 Amphibians = Class *Amphibia*

Insects = Class *Insecta*
 Reptiles = Class *Testudines, Sphenodontia, Squamata & Crocodylia*
 Molluscs = Phylum *Mollusca*

Arachnids = Class *Arachnida*
 Flowering plants = Phylum *Magnoliophyta*
 Gymnosperms = Superclass *Gymnospermae*

Ferns = Phylum *Pteridophyta*
 Mosses = Phylum *Bryophyta*
 Sac fungi = Phylum *Ascomycota*
 Basidiomycota = Phylum *Basidiomycota*

Change over time in records about biodiversity in Haiti

WHY MIGHT THE AMOUNT OF MOBILIZED DATA DECREASE?
 Datasets are sometimes removed by publishers, but more often decreases in the number of records are due to the removal of duplicate records and datasets.

SPECIES COUNTS represent the number of binomial scientific names for which GBIF has received data records, organized as far as possible using synonyms recorded in key databases like the Catalogue of Life

Newest publishers from Haiti

No data available

Occurrence records downloaded from GBIF.org, published by institutions in Haiti

See all publishers from this country or area
gbif.org/publisher/search?country=HT

Number of occurrence records downloaded via GBIF.org published by institutions in Haiti

Data mobilization

Data sharing with country or area of origin by national institutions in Haiti

Data sharing with country or area of origin

The chart above shows the number of records shared over time by publishers within Haiti, with separate colours for records about species occurring within undefined and those occurring elsewhere.

Top data contributors about biodiversity in Haiti

Rank	Country or area	No. of occurrences
1	United States of America	168,710
2	Haiti	98,906
3	Sweden	6,390
4	United Kingdom	6,083
5	Poland	3,731
6	Germany	3,435
7	Belgium	3,177
8	Netherlands	2,193
9	France	1,810
10	Colombia	690

Table 1. Ranking of countries or areas contributing data about Haiti

Top datasets contributing data about Haiti

EOD – eBird Observation Dataset. *98,906 occurrences in Haiti.* (Last updated 29 Oct 2025)

NMNH Extant Specimen Records (USNM, US). *40,334 occurrences in Haiti.* (Last updated 2 Jan 2026)

University of Florida Vertebrate Paleontology. *20,636 occurrences in Haiti.* (Last updated 29 Dec 2025)

Museum of Comparative Zoology, Harvard University. *18,617 occurrences in Haiti.* (Last updated 30 Dec 2025)

KUBI Herpetology Collection. *18,000 occurrences in Haiti.* (Last updated 1 Dec 2025)

Haiti participates in the following projects coordinated by GBIF

Developing biodiversity informatics in Haiti for better conservation management

BID: Biodiversity Information for Development, 2017–2018

By training local collection managers and data users, this project represents a first step toward establishing biodiversity informatics practices in Haiti.
