## Sint Maarten (Dutch part)

This report provides a series of summary charts, statistics and other details about the mobilization and use of open-access species data through the GBIF network, relating to users and participating institutions in Sint Maarten (Dutch part). These metrics show status at the time of report generation, unless otherwise noted. Taken together, the elements of this report can help guide and measure progress toward the information needs for biodiversity research, as well as for national commitments on biodiversity and sustainable development.

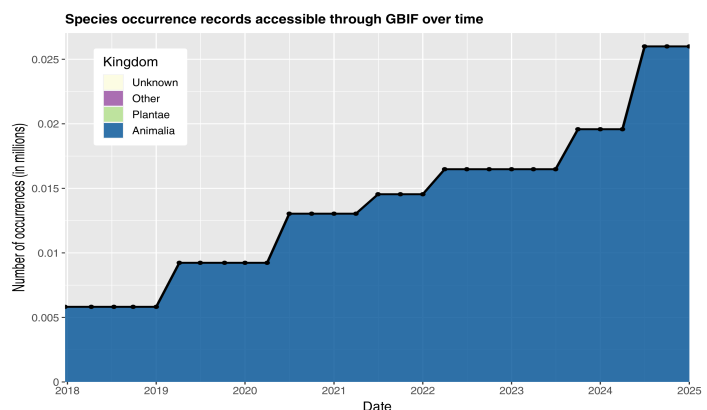

### ► Access and usage

### ► Data availability in Sint Maarten (Dutch part)

### ► Data mobilization

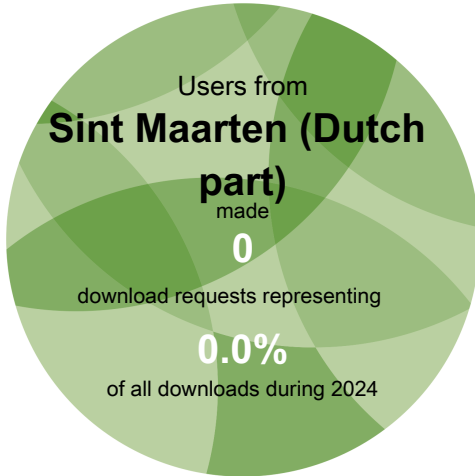

Number of records published by institutions in Sint Maarten (Dutch part), categorized by kingdom

## Access and usage

### Data downloads on GBIF.org from users in Sint Maarten (Dutch part)

Monthly downloads requested by users in Sint Maarten (Dutch part)

### Change over time in records about biodiversity in Sint Maarten (Dutch part)

Occurrence records available about species occurring in Sint Maarten (Dutch part)

Species for which at least one occurrence record is available in Sint Maarten (Dutch part)

#### WHY MIGHT THE AMOUNT OF MOBILIZED DATA DECREASE?

Datasets are sometimes removed by publishers, but more often decreases in the number of records are due to the removal of duplicate records and datasets.

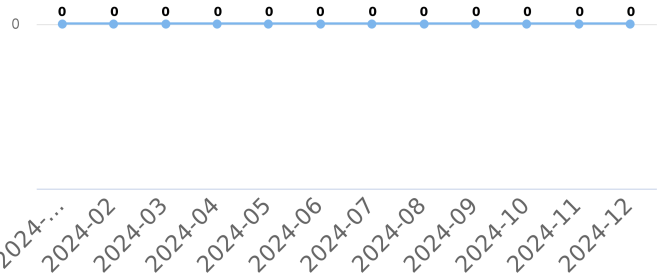

**SPECIES COUNTS** represent the number of binomial scientific names for which GBIF has received data records, organized as far as possible using synonyms recorded in key databases like the Catalogue of Life

### Newest publishers from Sint Maarten (Dutch part)

No data available

### Occurrence records downloaded from GBIF.org, published by institutions in Sint Maarten (Dutch part)
