Holy See

This report provides a series of summary charts, statistics and other details about the mobilization and use of open-access species data through the GBIF network, relating to users and participating institutions in Holy See. These metrics show status at the time of report generation, unless otherwise noted. Taken together, the elements of this report can help guide and measure progress toward the information needs for biodiversity research, as well as for national commitments on biodiversity and sustainable development.

▶ Access and usage

Researchers from Holy See contributed to 0 peer-reviewed articles citing GBIF use during 2023 and a total of 0 articles since 2008.

▶ Data availability in Holy See

- Animalia: 2,931 occurrences
- Plantae: 61 occurrences
- Fungi: 0 occurrences
- Unknown: 0 occurrences
- Protozoa: 0 occurrences
- Bacteria: 0 occurrences
- Virus: 0 occurrences
- Chromista: 1 occurrence
- Archaea: 0 occurrences

▶ Data mobilization

Institutions from Holy See published 728 new occurrence records during 2023 out of a total of 355,993,458 occurrence records added globally to GBIF.org.

Number of records published by institutions in Holy See, categorized by kingdom

Species occurrence records accessible through GBIF over time

Number of occurrences in millions

Date
Access and usage

Data downloads on GBIF.org from users in Holy See

Users from Holy See made 0 download requests representing 0.0% of all downloads during 2023.

Monthly downloads requested by users in Holy See
Data availability

Total data available for selected taxonomic groups in Holy See

Mammals = Class Mammalia
Birds = Class Aves
Amphibians = Class Amphibia

Insects = Class Insecta
Reptiles = Class Testudines, Sphenodontia, Squamata & Crocodylia
Molluscs = Phylum Mollusca

Arachnids = Class Arachnida
Flowing plants = Phylum Magnoliophyta
Ferns = Phylum Pteridophyta
Mosses = Phylum Bryophyta
Sac fungi = Phylum Ascomycota
Basidiomycota = Phylum Basidiomycota

WHY MIGHT THE AMOUNT OF MOBILIZED DATA DECREASE?

Datasets are sometimes removed by publishers, but more often decreases in the number of records are due to the removal of duplicate records and datasets.

SPECIES COUNTS represent the number of binomial scientific names for which GBIF has received data records, organized as far as possible using synonyms recorded in key databases like the Catalogue of Life.
Newest publishers from Holy See

No data available

Occurrence records downloaded from GBIF.org, published by institutions in Holy See
